CAREER OBJECTIVE

Motivated Computer Science student with proficiency in C/C++ and intermediate-level Java, and a strong interest in Artificial Intelligence, focused on developing efficient and reliable software solutions using core programming principles

EDUCATION

Bachelor of Computer Science & Engineering (2024 – 2028)

NATIONAL ENGINEERING COLLEGE, KOVILPATTI

PROJECTS

Tour Booking Management System Using C++

A console-based application to manage user sign-in, tour selection, booking, and payments, generating booking summaries with file handling and OOP concepts.

Machine Log Management System using Java

Built a Java-based Machine Log Monitoring application to capture and store machine operational data using HTML and Spring boot.

AI chatbot for web application (ongoing)

Currently working in an AI assistant for a college website to provide intelligent real-time responses and enhance user interaction using a rule-based system.

PreproX (ongoing)

A semi-automated AI powered data preprocessing and cleaning model that detects data quality issues, recommends cleaning operations, and generates reuseable preprocessing pipelines with human approval

SKILLS

- C/C++
- Java
- Python
- Machine Learning
- Springboot
- Data Structures & Algorithms
- Communication
- DBMS

- Basic experience in Data Cleaning, Data Handling, and AI Agent Development

CAPABILITIES & INTERESTS

Building ML Models

I develop machine learning models using Python and Scikit-learn, focusing on data preprocessing, training, evaluation, and solving real-world problems.

Building AI Agents

I build AI agents powered by Large Language Models, integrating prompts, tools, and workflows to automate tasks and deliver intelligent solutions.

Building Web Applications

I develop responsive full-stack web applications with Java, Spring Boot, HTML, CSS, JavaScript, and REST APIs.

ACADEMIC QUALIFICATION

SSLC: 92.4%

HSC: 87.16%

CGPA: 8.11 (up-to 3rd semester)
