CAREER OBJECTIVE

Motivated Computer Science student with proficiency in C/C++ and intermediate-level Java, passionate about Artificial Intelligence and Machine Learning. Focused on developing intelligent, data-driven solutions by applying machine learning algorithms, problem-solving skills, and core programming principles to build efficient and reliable AI-powered applications.

EDUCATION

Bachelor of Computer Science & Engineering (2024 – 2028)
NATIONAL ENGINEERING COLLEGE, KOVILPATTI

PROJECTS

Intelligent Campus Assistant (ongoing)

Currently working in an AI assistant for a college website to provide intelligent real-time responses and enhance user interaction using a rule-based system

AI-Based Landslide Risk Prediction and Early Warning System

Developed an AI-powered landslide monitoring and risk prediction system using XGBoost, LightGBM, GIS mapping, and SHAP explainability. The system aims to integrate environmental and geospatial data to identify high-risk zones and support early warning and disaster preparedness

RazorMind – AI-Powered Payment Intelligence & Revenue Recovery System

Developed a full-stack AI-powered platform using React, FastAPI, and SQLite to analyze payment failures, detect anomalies, predict revenue recovery, forecast revenue, & generate actionable business insights.

Leo – Local AI Assistant Using Ollama (ongoing)

Description: Developed a local AI assistant using Ollama and LLMs to provide intelligent responses while running AI models locally without external API dependencies.

SKILLS

- C/C++
- Java
- Python
- Machine Learning
- AI Agent Development
- Data Structures & Algorithms
- Communication
- DBMS
- Web Development (MERN)
- Data Analysis

ACADEMIC QUALIFICATION

SSLC: 92.4% HSC: 87.16% CGPA: 8.22 (up-to 4th semester)
